Docket No: Q55529

Takashi TAKAMI, et al.

Appln. No.: 09/380,032

Group Art Unit: 1731

Confirmation No.: 2082

Examiner: C. Fiorilla

Filed: November 09, 1999

For: FERRITE MAGNET AND METHOD FOR PRODUCING SAME

RECEIVED
SEP 4 - 2002
TC 1700

SUPPLEMENTAL AMENDMENT UNDER 37 C.F.R. § 1.111

Commissioner for Patents
Washington, D.C. 20231

Sir:

Further to Applicant's Amendment of July 1, 2002, please amend the above-identified application as follows:

IN THE SPECIFICATION:

The specification is changed as follows:

Page 1, delete first full paragraph and insert the following paragraph:

C 1
The present invention relates to a high-performance ferrite magnet having substantially a magnetoplumbite crystal structure extremely useful for wide ranges of magnet applications such as rotors for automobiles or electric apparatuses, magnet rolls for photocopiers, etc., particularly to a high-performance ferrite magnet having a microstructure having a higher coercivity iH_c (or higher coercivity iH_c and residual magnetic flux density B_r) than those of the conventional ferrite magnets and optionally a high squareness ratio H_k/iH_c , and a method for producing such a high-performance ferrite magnet.
